

Garden Watering Schedule by Season (Printable)

Template • Last updated: 2025-08-23 • Keyword: garden watering schedule

Use this printable to keep your watering plan consistent across zones. Calibrate by depth (15–20 cm), then adjust cycles per week with the seasons.

Garden / Site	Season (circle): Summer Autumn Winter Spring	Prepared by / Date

Zones Overview (record baseline that reaches 15–20 cm depth)

Zone / Bed	Crops	Emitters (L/hr)	Spacing (cm)	Runtime Baseline (min)

Seasonal Baselines (adjust locally)

Season	Cycles / Week	Runtime (min)	Notes (heat, wind, rain)	Verified Depth (cm)
Summer				
Autumn				
Winter				
Spring				

Drip Runtime Calibration (one-time per zone)

Tap setup (timer + filter + pressure reducer)	Emitters (L/hr)	Line spacing (cm)	Test cycle (min)	Depth after soak (cm)	Final baseline (min)

Heatwave Protocol

Early AM water	Split cycles	Temp shade for greens	Light prune/harvest
☐	☐	☐	☐

Notes

General notes, observations, reminders

Reminders:

- Calibrate by depth (15–20 cm). Mulch extends intervals; wind raises demand.
- Use separate zone for containers. Adjust after major weather changes or crop swaps.
- File naming tip for SEO: garden-watering-schedule-template.docx

Weekly Watering Planner

Plan cycles/week per zone; tick test-dig and adjustments.

Week of (date range)	Season	Weather notes (heat, rain, wind)

Weekly Schedule (tick marks or times per day)

Zone	Baseline (min)	Mon	Tue	Wed	Thu	Fri	Sat	Sun	Test-dig

Weekly Adjustments & Maintenance

Heatwave protocol used	Rain skip applied	Windy site adjustments	Mulch refreshed	Emitters checked	Runtime recalibrated
☐	☐	☐	☐	☐	☐

Containers (separate schedule)

Pot sizes / media	Runtime baseline (min)	Cycles this week	Notes

Tip: group crops by thirst so one runtime suits each zone. Verify with a quick wedge dig after a new setup or heatwave.
